## Technical Skills

### Front-End Languages

HTML 5  
CSS  
JavaScript

### Frameworks

jQuery  
Bootstrap  
Tailwind

### Back-End

Node.js  
npm  
npx  
R

## Projects

### Art Search Engine

A web app that gets artworks related to a search term from the Metropolitan Museum of Art API, and displays them with info about their artist, culture, period and medium. Local storage is also used to maintain a list of historical searches.

#### **Technologies Used**

JavaScript, jQuery, HTML CSS, TailwindCSS

#### **Link To Site**

<https://danielnels.github.io/Project-1-Get-Cultured/>

### Weather Dashboard

Using the Open Weather Map API, information on the current weather (temp, windspeed, humidity and UVI) and 5-day forecast is displayed for any real city searched for. Search history is retained in local storage.

#### **Technologies Used**

JavaScript, HTML CSS, Bootstrap

#### **Link To Site**

### Coding Quiz

A one-minute quiz that deducts time for wrong answers, gives feedback on the correctness of answers, ends the game on time-up, save highscores in local storage, and is mobile responsive.

#### **Technologies Used**

JavaScript, jQuery, HTML CSS
